

Hello CVSC Families,

We hope that everyone is settling into their teams for the 2021-2022 competitive season or excited to start their upcoming fall recreational season!

We wanted to communicate with everyone regarding the State's latest guidelines on the wearing of masks, as it relates to playing outdoor soccer.

The guideline that will apply to outdoor soccer will be the State's general face coverings guidelines as outlined [here](#). In summary, If you are fully vaccinated, masks are no longer required, with some exceptions. If you are not vaccinated, masks are required in indoor settings. For full information please review the link in detail.

Alameda County has also confirmed that there will be no additional youth sports guidelines with the State recently reopening on June 15, 2021 and that they will follow the State's general face covering guidelines as outlined above.

Unless a specific venue requires masks to be worn, then CVSC will be following the latest guidelines from the State. If a home or away venue does require masks to be worn then we will communicate this to families for those teams.

Of course players, coaches, and families are welcome to continue wearing masks if they individually choose. This policy also aligns with our 24/7 partner club, Association Football Club (AFC).

Any further questions please feel free to reach out to any of our board members.

Thanks,
CVSC Board of Directors
